

## INDEX OF SUBJECTS

### A

- Abbott TDx monoclonal whole-blood assay, of cyclosporine A, clinical utility of, 441
- Acanthamoeba* infection, presenting as skin lesions, in acquired immunodeficiency syndrome, 441
- Accuracy  
of Companion 2 Glucose Sensor, 441  
of MediSense Companion, 441
- Acid-fast stain, bone marrow smears and, refractile mycobacteria in, 318
- Acquired immunodeficiency syndrome  
*Acanthamoeba* infection presenting as skin lesions in, 441  
bacillary epithelioid angiomatosis in, involving liver, spleen, and skin, 713  
bone marrow B-cell lymphoma in, with abnormal karyotypes, 441  
*Cryptococcus neoformans* in, identification as leukocytes by Coulter counter, 663  
duodenal biopsy specimens in, 21  
flow cytometric measurement of CD4+ lymphocytes in, interference of recombinant soluble CD4 immunoglobulin G in, 166  
hairy leukoplakia in, diagnosis by exfoliative cytologic methods, 262  
mycobacterial lymphadenitis in, morphologic features of, 441  
osteomyelitis in, *Mycobacterium hemophilum* causing, 441  
refractile mycobacteria in, in Romanowsky-stained bone marrow smears, 318  
thymic pseudotumorous enlargement due to follicular lymphoid hyperplasia in, 420
- Adenocarcinoma  
colon-specific antigen in, nonspecificity of, 490  
of lung  
  clinicopathologic and immunohistochemical features of, 678  
  peripheral airway cell marker expression in, 233  
  prostatic, oncogenic antigen 519 expression in, as potential prognostic indicator, 686
- Adenofibroma, papillary, of uterus, 806
- Adenoma, papillary, of lung, 393
- Adenosquamous carcinoma, of lung, clinicopathologic and immunohistochemical features of, 678
- Adenovirus, in gastrointestinal tract, of immunosuppressed patients, 555
- Adrenal cortex  
  neoplasms of, pathologic diagnosis of, 73  
  pathology of, silver stained nucleolar organizer regions in, diagnostic utility of, 441
- Adult patient, recurrent myofibromatosis in, 810
- Albumin, use in large teaching hospital, 441
- Alcoholic liver disease, erythrocyte antioxidant activity, serum ceruloplasmin, and trace element levels in, 614
- Alkaline phosphatase  
  in immunocytochemical analysis of acute leukemias, 876  
  labeling and, lymphocyte subtyping by, in peripheral blood, 322
- Alkaline phosphatase isoenzyme electrophoresis, in liver disease, 441
- Allele-specific oligonucleotides, polymerase chain reaction mismatch technique to identify HLA-DQw8 allele in patients with type I diabetes mellitus and, 29
- Allografts, autopsies and, 301
- Alpha-fetoprotein, maternal  
  medial levels of, in twin pregnancies, 441  
  screening of, 541
- Alpha-test site, relationship between pathology department and laboratory information system vendor and, 363
- Amniotic fluid, analysis by 600 MHz proton nuclear magnetic resonance spectroscopy, 441
- Amphetamine, quantitation in urine, using solid-phase derivitization and reversed-phase high-performance liquid chromatography, 441
- Amphicrine carcinoma, of uterine cervix, 516
- Amyloid, localized to tenosynovium, at carpal tunnel release, 250
- Amyloidosis, fibrillar glomerulopathy and, immunohistochemical distinction between, 787
- Anemia  
  autologous blood transfusion and, successful, factors associated with, 304  
  of chronic disease, reticulocyte mean channel fluorescence and, 130  
  copper deficiency, zinc-induced, bone marrow precursor cells in, morphologic findings in, 665
- Aneuploid erythroid precursors, image cytometric detection of, in dyserythropoietic states, 441
- Angina, unstable, in Bernard-Soulier syndrome, 652
- Angiomatosis, epithelioid, bacillary, involving liver, spleen, and skin, in acquired immunodeficiency syndrome with Kaposi's sarcoma, 713
- Angiosarcoma, of colon, developing in capsule of foreign body, 416
- Anti-Factor V antibodies, after surgical use of bovine thrombin, 84
- Anti-mitochondrial antibodies, flow cytometric detection of, in primary biliary cirrhosis, 202
- Anti-Pr antibody, in cold agglutinin disease, after chicken pox, 92
- Anti-thrombin antibodies, after surgical use of bovine thrombin, 84
- Aortitis, "tree-barking" of ascending aorta in, 58
- Artifact, serum bicarbonate testing and, sample size in vacutainer tubes and, 213
- Asbestos  
  direct identification in ferruginous bodies, by scanning electron microscopy, elemental analysis, and electron diffraction studies, 441  
  extraskeletal myxoid chondrosarcoma of pleura and, 498
- Aspergillus*, significance in cytology specimens, 441
- Aspergillus terreus*, as cause of septic olecranon bursitis, 114
- Atherosclerosis  
  in Bernard-Soulier syndrome, 652  
  of ligamentum arteriosum, 441  
  severity of, lipoprotein (a) level and, 441
- Atrophoderma of Pasini and Pierini, immunophenotypic features of, 63
- Atypical hyperplasia, ABH(O) blood group antigen expression in, 441
- Autoantibodies, associated with collagen-vascular diseases, commercial enzyme immunoassays vs. immunofluorescence and double diffusion for, 559
- Autochthonous production, of immunoglobulin G and oligoclonal immunoglobulins, in multiple sclerosis, detection of, 858
- Autoimmune hemolytic anemia, after chicken pox, 92

## Automation

- accuracy and utility of differential white blood cell count in neonatal intensive care unit and, 338
- automated differential count and, comparative study of four analyzers for, 345
- computerized cell image analysis of thyroid lesions and, 776
- computerized pneumatic tube system and, effects on analytical results and turnaround time, 535
- of white blood cell differential, unsuspected eosinophilia discovered by, clinical significance of, 441

## Autopsy

- allografts and, 301
- in cardiac transplant patients, 369

## B

Bactec high-volume resin media, hypertonic media vs., in blood culture, 850

## Bacteria

- Corynebacterium jeikeium* among blood culture isolates of, 441
- cross-reaction of, with Chlamydiazyme test, before and after use of blocking agent, 309

B-cell neoplasia. *See also* Lymphoma, B-cell

- residual, detection by polymerase chain reaction, 441

Benign cellular atypia, cervical, routine Pap smear and, 441

## Benign prostatic hyperplasia

- prostate-specific antigen in, diagnostic efficiency of, 441
- serum prostate-specific antigen in, alterations associated with digital rectal examination and, 466, 528

Bernard-Soulier syndrome, atherosclerosis and unstable angina in, 652

Beta-test site, relationship between pathology department and laboratory information system vendor and, 363

Bicarbonate, serum, sample size in vacutainer tubes and, 213

Birefringence, in laboratory assessment of fetal lung maturity, 836

Birth defects, maternal alpha-fetoprotein screening and, 541

Bivariate comparison, quality control of multichannel hematology analyzers and, 645

## Blocking assay

- cross-reaction of bacteria and yeasts with Chlamydiazyme test and, 309
- detection of *Chlamydia trachomatis* by, in endocervical specimens, 209

Blood. *See also* Hematopoiesis

- hematologic measurements and, computerized pneumatic tube specimen delivery system and, 535
- hematology multichannel analyzers and, quality control of, 645
- hemogram and, identification of *Cryptococcus neoformans* as leukocytes and, 663
- hemostasis and, preoperative tests of, predictability on blood loss and transfusion in cardiac surgery, 441
- loss of, in cardiac surgery, preoperative hemostasis tests and, 441
- after marrow transplantation and rhGM-CSF therapy, 631
- transfusion of. *See* Transfusions

Blood-brain barrier, autochthonous production of immunoglobulin G and oligoclonal immunoglobulins in multiple sclerosis and, detection of, 858

Blood counting. *See also* White blood cell differential

- automated differential count and, comparative study of four analyzers for, 345
- of leukocytes, low numbers of, 872
- spurious thrombocytopenia and, due to EDTA-independent cold-reactive agglutinins, 359

Blood culture, Bactec high-volume resin media vs. hypertonic media in, 850

Blood gases, computerized pneumatic tube specimen delivery system and, 535

Blood glucose testing, bedside, cost analysis of, 106

Blood group antigens, expression in endometrial hyperplasia, atypical hyperplasia, and well-differentiated endometrial carcinoma, 441

B lymphocytes, circulating, splenic lymphoma with, 147

## Bone marrow

- B-cell lymphoma of, with abnormal karyotypes, in acquired immunodeficiency syndrome, 441
- immunohistologic analysis of, in myelomonocytic leukemia, 441
- after marrow transplantation and rhGM-CSF therapy, 631
- precursor cells of, in zinc-induced copper deficiency anemia, morphologic findings in, 665
- Romanowsky-stained smears of, refractile mycobacteria in, 318
- transplantation of
  - autologous, in multiple myeloma, clonal immunoglobulin additions following, 441
  - bone marrow and blood findings after, 631
  - erythropoiesis after, kinetics of, 574

## Breast

- lesions of, in pregnant women, fine-needle aspiration of, 441
- malignant lymphoma of, immunologic type and association with lymphocytic mastopathy, 699
- subcutaneous nodule of, *Dirofilaria repens* manifesting as, 625

## Breast carcinoma

- c-erbB-2* proto-oncogene expression and nuclear DNA content in, S48
- fine-needle samples of, immunocytochemical determination of estrogen and progesterone receptors on, 254
- histologic grade of, correlation with cytologic features on fine-needle aspiration, 441
- metastatic to spleen, 484
- simulating fibroadenoma or fibrocystic change on needle aspirate smears, 441
- in vitro* bromodeoxyuridine labeling in, 441

## Breast tissue

- benign, calcium oxalate association with, 441
- paraffin-embedded, radiologic identification of microcalcifications in, significance of, 441

## Bromodeoxyuridine staining

- proliferative capacity and, 441
- in renal cell carcinoma, S39
- in vitro*, in breast carcinoma, 441

## Bronchoalveolar lavage

- cellular and supernatant components in specimens, differential recovery of cytomegalovirus from, 313
- hyperplasia of type II pneumocytes in acute lung injury and, 669
- monoclonal antibodies to *Pneumocystis carinii* and, 619

Burn patients, urinary tract infections in, predicting from microscopic urinalysis results, 441

## C

Calcium oxalate, association with benign breast tissue, 441

Cancer. *See specific types and sites*

Carbon dioxide, serum bicarbonate testing and, sample size in vacutainer tubes and, 213

Carcinoembryonic antigen, metastatic ovarian carcinoma and, of large intestinal origin, simulating primary ovarian carcinoma, 751

Carcinoids, gastrointestinal, biologic aggressiveness of, clinicopathologic indices for, 441

Carcinoma *in situ*, of breast, *c-erbB-2* proto-oncogene expression and nuclear DNA content in, S48

- Cardiac surgery  
blood loss and transfusion in, preoperative hemostasis tests and, 441  
transplantation, autopsy and, 369
- Cardiomyopathy, dilated, reversible  
due to growth hormone deficiency, 503  
treatment of, 503
- Carpal tunnel release, amyloid localized to tenosynovium at, 250
- Catalase, in alcoholic liver disease, 614
- Cathepsin D, in endometrial adenocarcinoma, correlation with differentiation and invasiveness of, 764
- Cat-scratch disease, bacillary epithelioid angiomatosis vs., 713
- CD15, in Hodgkin's disease, staining for with secondary antibody specific for immunoglobulin M, 135
- CD43 (Leu 22), immunophenotyping and, 861
- CD68, in malignant fibrous histiocytoma, as histiocyte-specific marker in diagnosis, 759
- CD4 lymphocytes, flow cytometric measurement of, interference of recombinant soluble CD4 immunoglobulin G in, 166
- Cell(s)  
of bronchoalveolar lavage specimen, recovery of cytomegalovirus from, 313  
determination of estrogen and progesterone receptors and, on fine-needle samples of breast cancer, 254
- Cell proliferation  
morphologic and immunocytochemical assessments of, S4  
nuclear antigen and  
in formalin-fixed paraffin-embedded tissue, correlation with Ki-67 in fresh tissue, S21  
monoclonal antibody to, immunocytochemical identification of hepatocytes using, S14
- Cellular anti fluorescence, proliferative capacity and, 441
- c-erbB-2 oncogene  
expression in breast carcinoma, S48  
immunoreactivity for, in benign and malignant diseases of liver, S54
- Cerebrospinal fluid, in multiple sclerosis, autochthonous production of immunoglobulin G and oligoclonal immunoglobulins in, detection of, 858
- Ceruloplasmin, in alcoholic liver disease, 614
- Cervical intraepithelial neoplasia, dot filter hybridization vs. conventional morphologic analysis for detection of human papillomavirus and, 46
- Chemical measurements, computerized pneumatic tube specimen delivery system and, 535
- Chicken pox, cold agglutinin disease after, 92
- Chlamydial antigen, Chlamydiazyme test for, cross-reaction of bacteria and yeasts with, before and after use of blocking agent, 309
- Chlamydia trachomatis, detection of, in endocervical specimens, by Chlamydiazyme plus blocking assay, 209
- Chlamydiazyme test  
cross-reaction of bacteria and yeasts with, before and after use of blocking agent, 309  
detection of Chlamydia trachomatis by, in endocervical specimens, 209
- Cholangiocarcinoma, c-erbB-2 oncogene in, immunoreactivity for, S54
- Cholangitis, primary sclerosing, c-erbB-2 oncogene in, immunoreactivity for, S54
- Cholesterol proficiency testing, matrix effects and, 441
- Chondrosarcoma, myxoid, extraskeletal, pleural, 498
- Choristoma, 402
- Cirrhosis  
needle biopsy diagnosis of, histologic clues and laparoscopic findings compared and, 441  
primary biliary, anti-pyruvate dehydrogenase antibody in, flow cytometric detection of, 202
- Clara cells  
in non-small cell lung carcinoma, 233  
in papillary adenoma of lung, 393
- Classification, of lymphadenopathy, in cutaneous T-cell lymphoma, 121
- Clinical laboratory correlation, accuracy and utility of differential white blood cell count in neonatal intensive care unit and, 338
- Clonal evolution, in Richter's syndrome, 656
- Clonal origin, in Richter's syndrome, 656
- CMV scan, cytomegalovirus antibody detection by, 441
- Coagulation tests, indications for, 441
- Cold agglutinin disease, after chicken pox, 92
- Cold-reactive agglutinins, EDTA-independent, spurious thrombocytopenia due to, 359
- Collagen type IV, in lobular capillary hemangioma, immunohistochemistry of, 770
- Collagen-vascular diseases, autoantibodies associated with, commercial enzyme immunoassays vs. immunofluorescence and double diffusion for, 559
- Colon  
angiosarcoma of, developing in capsule of foreign body, 416  
epithelium of, metaplastic, in inflammatory bowel disease, 441  
Colon-specific antigen, in adenocarcinoma, nonspecificity of, 490  
Colony-stimulating factors, modifying hematopoiesis with, 605  
Colorectal adenoma, p53 expression in, immunohistochemical study of, 244
- Colorectal carcinoma  
location of, correlation of red blood cell distribution width values with, 441  
p53 expression in, immunohistochemical study of, 244
- Commercial prototype, relationship between pathology department and laboratory information system vendor and, 363
- Companion 2 Glucose Sensor, accuracy and precision of, 441
- Complete blood counts, accuracy and utility of, in neonatal intensive care unit, 338
- Computer image DNA histograms, self-organizing neural networks analysis of, 441
- Computerized cell image analysis, of thyroid lesions, 776
- Computerized pneumatic tube system, effects on analytical results and turnaround time, 535
- Control rule, quality control of multichannel hematology analyzers and, 645
- Copper deficiency anemia, zinc-induced, bone marrow precursor cells in, morphologic findings in, 665
- Coronary arteries, occlusion of, lipoprotein (a) level and, 441
- Coronary artery bypass, interleukin-1 $\alpha$  in occlusive vascular disease and, 8
- Coronary reperfusion, serum cardiac markers for acute myocardial infarction and, 217
- Corynebacterium jeikeium, identification among blood culture isolates of Coryneform bacteria, 441
- Cost analysis, of bedside blood glucose testing, 106
- Cost effectiveness, of bedside blood glucose testing, 106
- Counting, of leukocytes, low numbers of, 872
- Cowden's disease, associated with renal cell carcinoma and primary neuroendocrine carcinoma of skin, 705
- Creatine kinase MB isoenzyme, immunohistologic demonstration of, 376
- Crossmatching, in vivo, multiinstitutional evaluation of, 441
- Cross-reaction, of clinical isolates of bacteria and yeasts, with Chlamydiazyme test, before and after use of blocking agent, 309
- Cryptococcus neoformans, identification as leukocytes by Coulter counter, 663
- Cyclosporine A, Abbott TDx monoclonal whole-blood assay of, clinical utility of, 441

- Cytobrush collection technique, for cervical cytology, extent and rationale of clinician's lack of use of, 441
- Cytodiagnosis  
of body fluids, Leu M-5 (CD 11c) in, 441  
of hairy leukoplakia, exfoliative methods, 262
- Cytogenetics, in familial chronic lymphocytic leukemia, 184
- Cytology. *See also* Fine-needle aspiration  
cervical, cytobrush collection technique for, extent and rationale of clinician's lack of use of, 441  
dot filter hybridization vs. conventional morphologic analysis for detection of human papillomavirus and, 46  
hyperplasia of type II pneumocytes in acute lung injury and, 669  
of serous effusions, 441  
type II pneumocytes in specimens and, 608
- Cytomegalovirus  
antibody to, detection of, TranStat CMV and CMV Scan in serum and, 441  
culture of, from cellular and supernatant components of bronchoalveolar lavage specimen, 313
- Cytomegalovirus-immunoglobulin M, detection of, indirect enzyme-labeled immunosorbent assay vs. immunoglobulin M class capture assay for, 441
- Cytoplasmic vacuoles, in bone marrow precursor cells, in zinc-induced copper deficiency anemia, 665
- Cytospin technique, in leukopenia, 441

## D

- Decision making, accuracy and utility of differential white blood cell count in neonatal intensive care unit and, 338
- Densitometer, electrophoretic estimation of concentration of polyclonal immunoglobulins in serum and, 610
- Density gradient centrifugation, isolation of platelets from human blood by, rapid method for, 441
- Dermatofibrosarcoma protuberans, immunohistochemical characterization of, 478
- Diabetes mellitus  
gestational, oral glucose tolerance test in, 831  
type I, polymerase chain reaction mismatch technique to identify HLA-DQw8 allele in, 29
- Diagnosis. *See also* Cytodiagnosis  
of *Dirofilaria repens* manifesting as breast nodule, 625  
histologic, of adrenal cortical neoplasms, 73
- Diagnostic related group, clinicians' responses to abnormal laboratory data as function of, 818
- Diarrhea, duodenal biopsy specimens in HIV-infected patients with and without, 21
- Differential white counts. *See* White blood cell differential
- Digoxigenin, probes labeled by, detection of T-cell gene rearrangements by, 638
- Dirofilaria repens*, manifesting as breast nodule, 625
- DNA  
antibodies to, associated with collagen-vascular diseases, commercial enzyme immunoassays vs. immunofluorescence and double diffusion for, 559  
bivariate analysis of, in renal cell carcinoma, S39  
determination of estrogen and progesterone receptors and, on fine-needle samples of breast cancer, 254  
flow cytometric analysis of endometrial stromal sarcoma and, 267
- DNA analysis  
diagnosis of adrenal cortical neoplasms and, 73  
by flow cytometry, in multiple myeloma, clinical correlations and, 322

- of lymph node interdigitating cell sarcoma, 139  
of paraffin-embedded tissue, variation in reference cells for, 387
- DNA aneuploid tumor, in resected tissue, fine-needle aspiration ascertainment of, 441
- DNA histograms, computer image, self-organizing neural networks analysis of, 441
- DNA ploidy  
in breast carcinoma, S48  
of soft tissue sarcomas, determination by image cytometry of fresh frozen tissue, S30
- DNA polymerase, hepatocytes positive for, immunocytochemical identification of hepatocytes using monoclonal antibody to proliferating cell nuclear antigen and, S14
- Dot filter hybridization, for detection of human papillomavirus, conventional morphologic analysis vs., 46
- Down's syndrome  
maternal alpha-fetoprotein screening and, S41  
transient myeloproliferative disorder and, prenatal diagnosis via percutaneous umbilical blood sampling, S84
- Drug distribution, in plasma protein and lipoprotein fractions, tabletop ultracentrifuge determination of, 441
- Dysembryoplastic neuroepithelial tumor, 398
- Dyserythropoietic states, aneuploid erythroid precursors detected in, by image cytometry, 441
- Dysplasia, human papillomavirus infection of uterine cervix and, correlation between infection rates and, 692

## E

- Ear canal, recurrent myofibromatosis in, 810
- Electron diffraction studies, direct identification of asbestos fibers in ferruginous bodies by, 441
- Electron microscopy  
in acute myelogenous leukemia, with eosinophilia, serum lysozyme value and, 195  
duodenal biopsy specimens in HIV-infected patients and, 21  
immunohistochemical analysis vs., in diagnostic surgical pathology, 441  
in pulmonary meningioma, 814  
scanning  
direct identification of asbestos fibers in ferruginous bodies by, 441  
ultrastructural features of spindle cell hemangioendothelioma and, 279  
transmission, ultrastructural features of spindle cell hemangioendothelioma and, 279
- Electrophoresis  
alkaline phosphatase isoenzyme, in liver disease, 441  
detection of autochthonous production of immunoglobulin G and oligoclonal immunoglobulins in multiple sclerosis and, 858  
immunofixation, clonal immunoglobulin additions demonstrated by, in multiple myeloma, following autologous bone marrow and/or peripheral stem cell transplantation, 441  
two-dimensional, in polyacrylamide cells, quality assurance and reproducibility of, 97  
underestimation of concentration of polyclonal immunoglobulins in serum by, 610
- Elemental analysis, direct identification of asbestos fibers in ferruginous bodies by, 441
- En bloc* silver impregnation, Lipiodol distribution in hepatocellular carcinoma and, 405
- Endocrine cell hyperplasia, in inflammatory bowel disease, 441
- Endometrial carcinoma  
adenocarcinomatous, cathepsin D in, correlation with differentiation and invasiveness, 764

- well-differentiated, ABH(O) blood group antigen expression in, 441
- Endometrial hyperplasia, ABH(O) blood group antigen expression in, 441
- Endometrial neoplasms, steroid hormone receptors in, 381
- Endometrioid-like pattern, of metastatic ovarian carcinoma, of large intestinal origin, simulating primary ovarian carcinoma, 751
- Endothelium
  - digitating, in spindle cell hemangioendothelioma, 279
  - immunohistochemical study using four different markers, 441
- Engraftment, of bone marrow, erythropoiesis after, kinetics of, 574
- Enterocytes, duodenal biopsy specimens in HIV-infected patients and, 21
- Enzyme histochemistry, of lymph node interdigitating cell sarcoma, 139
- Enzyme-labeled immunosorbent assay, indirect, cytomegalovirus-immunoglobulin M detection by, immunoglobulin M class capture assay vs., 441
- Enzyme-linked immunoassay
  - for autoantibodies associated with collagen-vascular diseases, 559
  - detection of *Chlamydia trachomatis* by, in endocervical specimens, 209
- Eosinophilia, unsuspected, discovered by automated white blood cell differential, clinical significance of, 441
- Epidemiology, of *Dirofilaria repens* manifesting as breast nodule, 625
- Epidermal growth factor receptors, in multiple hamartoma syndrome associated with renal cell carcinoma and primary neuroendocrine carcinoma of skin, 705
- Epilepsy, dysembryoplastic neuroepithelial tumor and, 398
- Epstein-Barr virus, in hemophagocytic syndrome, T-cell lymphoma and, 189
- Erythrocyte antioxidant activity, in alcoholic liver disease, 614
- Erythrophagocytosis, cold agglutinin disease and, after chicken pox, 92
- Estrogen receptors
  - in breast cancer, immunocytochemical determination on fine-needle samples of, 254
  - in cervical adenocarcinoma, immunohistochemical evaluation of, 441
  - in lobular capillary hemangioma, immunohistochemistry of, 770

## F

- Factor V, antibodies to, after surgical use of bovine thrombin, 84
- Factor V anticoagulant, after surgical use of bovine thrombin, 84
- Factor VIII, in lobular capillary hemangioma, immunohistochemistry of, 770
- Fetal lung maturity, laboratory assessment of, 836
- Feulgen staining, of thyroid lesions, 776
- Fibrillar deposits
  - amyloidosis and, immunohistochemical distinction between, 787
  - glomerulopathy with, 441
- Fibroxanthomas, atypical, immunohistochemical characterization of, 478
- Fine-needle aspiration
  - of breast lesions
    - breast carcinoma simulating fibroadenoma or fibrocystic change and, 441
    - correlation of histologic grade with, 441
    - immunocytochemical determination of estrogen and progesterone receptors and, 254
    - in pregnant women, 441
  - diagnosis of occult metastatic mesothelioma by, 493
  - DNA aneuploid tumor in resected tissue and, ascertainment of, 441
  - intranodal myofibroblastoma in submandibular lymph node and, 69
  - of spleen, in neoplastic disorders, 441
  - of unsuspected cystic parathyroid lesions, 441
- Flow cytometry
  - counting of low numbers of leukocytes by, 872
  - cytoplasmic mu ( $C\mu$ ) expression in acute lymphoblastic leukemia and, 885
  - detection of anti-pyruvate dehydrogenase antibody by, in primary biliary cirrhosis, 202
  - determination of estrogen and progesterone receptors by, on fine-needle samples of breast cancer, 254
  - DNA analysis by, in multiple myeloma, clinical correlations and, 322
  - effect of verapamil on receptor expression of biologically active interleukin-2, measurement using phycoerythrin-conjugated recombinant interleukin-2, 441
  - in endometrial stromal sarcoma, 267
  - erythropoiesis kinetics after bone marrow transplantation and, 574
  - hydatiform mole and, partial vs. complete, 441
  - immunophenotype data and, neural network analysis of, 441
  - light scatter/absorption, lymphocyte subtyping by, in peripheral blood, 322
  - measurement of CD4+ lymphocytes and, interference of recombinant soluble CD4 immunoglobulin G in, 166
  - reference cells for DNA analysis of paraffin-embedded tissue and, variation in, 387
  - in renal cell carcinoma, prediction of malignant potential by, 539
  - reticulocyte mean channel fluorescence and, iron status and, 130
  - in testicular embryonal carcinoma, 441
- Fluorescence depolarization, in laboratory assessment of fetal lung maturity, 836
- Foam stability, in laboratory assessment of fetal lung maturity, 836
- Follicular hyperplasia, lymphoid, in HIV-positive patient, thymic pseudotumorous enlargement due to, 420
- Foreign body, angiosarcoma of colon developing in capsule of, 416
- Foreign-body reaction, Fourier transform infrared spectroscopy in organic oil mastitis and, 34
- Fourier transform infrared spectroscopy, in organic oil mastitis, 34

## G

- Ganglioglioma, dysembryoplastic neuroepithelial tumor vs., 398
- Gastric emptying, oral glucose tolerance test in gestational diabetes mellitus and, 831
- Gastric exclusion, regression of hepatic steatosis after, 441
- Gastritis
  - chronic active, *Treponema pallidum* and *Helicobacter pylori* in, 116
  - syphilitic, *Treponema pallidum* and *Helicobacter pylori* in, 116
- Gastrointestinal tract. *See also* Colon
  - carcinoids of, biologic aggressiveness of, clinicopathologic indices for, 441
  - diffuse aggressive B-cell lymphomas of, immunophenotypic and gene rearrangement analysis of, 170
  - of immunosuppressed patients, adenovirus in, 555
  - mast cell hyperplasia of, in systemic sclerosis, 441
  - small intestinal disorders in HIV-infected patients and, duodenal biopsy specimens in, 21
- Gene rearrangements
  - of diffuse aggressive B-cell lymphomas, of gastrointestinal tract, 170
  - in familial chronic lymphocytic leukemia, 184
  - immunoglobulin heavy chain, polymerase chain reaction, 441
  - T-cell, detection by digoxigenin-labeled probes amplified from genomic DNA, 638
- Gene sequencing, typing of ciprofloxacin-resistant methicillin-resistant *Staphylococcus aureus* by, genomic restriction endonuclease analysis vs., 441
- Genetic counseling, maternal alpha-fetoprotein screening and, 541
- Genomic restriction endonuclease analysis, typing of ciprofloxacin-resistant methicillin-resistant *Staphylococcus aureus* by, gene sequencing vs., 441

Germ cell tumor, transformation of seminoma to, 463, 468  
 Glioma, mixed, dysembryoplastic neuroepithelial tumor vs., 398  
 Glomerulopathy  
   with deposits containing thick fibrillary structures, 441  
   fibrillar, amyloidosis and, immunohistochemical distinction between, 787  
 Glutathione, reduced, in alcoholic liver disease, 614  
 Glutathione peroxidase, in alcoholic liver disease, 614  
 Glycoprotein(s)  
   in B-cell lymphoma cells, Russell bodies and, 866  
   nonspecificity of colon-specific antigen in adenocarcinoma and, 490  
 Gonadotropin-releasing hormone agonists, uterine leiomyomas treated with, 441  
 Granulomatous disease, chronic, superoxide release from phagocytes in small volumes of whole blood in, rapid, specific assay for, 566  
 Granulosa cell tumors, juvenile, associated with Maffucci's syndrome, 523  
 Grocott silver stains, monoclonal antibodies to *Pneumocystis carinii* and, 619  
 Growth hormone, deficiency of, reversible dilated cardiomyopathy due to, 503

## H

Hairy leukoplakia, diagnosis by exfoliative cytologic methods, 262  
 Hamartoma, multiple hamartoma syndrome and, associated with renal cell carcinoma and primary neuroendocrine carcinoma of skin, 705  
 Haptoglobin-related protein, in prostatic adenocarcinoma, as potential prognostic indicator, 686  
 Heart. *See also* Cardiac surgery  
   in tetanus, histopathology of, 441  
 Heat shock proteins, detection of myocardial ischemia by immunoperoxidase staining for, 441  
*Helicobacter pylori*, in chronic active gastritis, 116  
 Hemangioendothelioma, spindle cell, ultrastructural features of, 279  
 Hemangioma, capillary, lobular, immunohistochemistry of, 770  
 Hematologic measurements, computerized pneumatic tube specimen delivery system and, 535  
 Hematology multichannel analyzers, quality control of, 645  
 Hematopoiesis  
   extraadrenal myeloidoma and, 402  
   after marrow transplantation and rhGM-CSF therapy, 631  
   modifying with colony-stimulating factors, 605  
 Hemogram, identification of *Cryptococcus neoformans* as leukocytes and, 663  
 Hemolytic anemia, autoimmune, after chicken pox, 92  
 Hemophagocytic syndrome, T-cell lymphoma and, 189  
 Hemostasis, preoperative tests of, predictability on blood loss and transfusion in cardiac surgery, 441  
 Heparin, thrombocytopenia induced by, effect of heparin source and concentration on *in vitro* platelet aggregation and, 441  
 Hepatic steatosis, regression after gastric exclusion for morbid obesity, 441  
 Hepatitis, non-A, non-B, antibody to, in human immunoglobulins, prevalence of, 108  
 Hepatitis C virus  
   antibodies and infectivity of, 4  
   antibody to, in human immunoglobulins, prevalence of, 108  
   disease activity of, polymerase chain reaction detection of hepatitis C virus and, 441  
 Hepatocellular carcinoma  
   *c-erbB-2* oncogene in, immunoreactivity for, S54

immunocytochemical identification of hepatocytes using monoclonal antibody to proliferating cell nuclear antigen and, S14  
   Lipiodol distribution and evidence for tumor necrosis in, 405  
 Herpes simplex virus infection, of placenta and associated tissues, 441  
 Heterotopic tissue, extraadrenal myeloidoma and, 402  
 High-performance liquid chromatography, reversed-phase, amphetamine quantitation using, 441  
 Hip replacement, salvage and survival of red blood cells after, 441  
 Histiocytoma, fibrous, of parotid gland, 512  
 Histogenesis, of transformation of seminoma to yolk sac tumor, 468  
 Histologic diagnosis, of adrenal cortical neoplasms, 73  
 Hodgkin's disease, Leu M1 (CD15) in, staining for, with secondary antibody specific for immunoglobulin M, 135  
 Hormonal receptors, in endometrial stromal sarcomas, 381  
 Human immunodeficiency virus  
   anti-HIV-1 antibody and, rapid peptide-based assay for, 854  
   flow cytometric measurement of CD4+ lymphocytes in, interference of recombinant soluble CD4 immunoglobulin G in, 166  
   monoclonal antibody to *Pneumocystis carinii* in, 619  
 Human papillomavirus  
   detection of, dot filter hybridization vs. conventional morphologic analysis for, 46  
   infection of uterine cervix by, correlation between infection rates and dysplasia and, 692  
   in penile lesions, distribution of, polymerase chain reaction detection of, 441  
   RNA, in penile dysplasias and carcinomas, differing prevalence and etiology of, 272  
   *in situ* hybridization of, in precursor lesions of penis, 441  
 Hydatiform mole, partial vs. complete, distinction by flow cytometric analysis, 441  
 Hypertonic media, Bactec high-volume resin media vs., in blood culture, 850  
 Hypomagnesemia, in acute and chronic care patient populations, 827

## I

Image cytometry  
   analysis of paraffin-embedded sections of renal cortical neoplasms by, 441  
   aneuploid erythroid precursors detected by, in dyserythropoietic states, 441  
   DNA ploidy and proliferation index of soft tissue sarcomas determined by, S30  
 Immunoassay  
   for anti-HIV-1 antibody detection, 854  
   detection of anti-pyruvate dehydrogenase antibody by, in primary biliary cirrhosis, 202  
 Immunochemistry, criteria for characterization of monoclonal gammopathies, 441  
 Immunocytochemistry  
   of cell proliferation, S4  
   identification of hepatocytes using monoclonal antibody to proliferating cell nuclear antigen and, S14  
   rapid, in acute leukemia, 876  
 Immunocytoma, of spleen, 147  
 Immunoelectron microscopy, amyloidosis vs. fibrillar glomerulopathy and, 787  
 Immunofixation electrophoresis, clonal immunoglobulin additions demonstrated by, in multiple myeloma, following autologous bone marrow and/or peripheral stem cell transplantation, 441  
 Immunofluorescence, cytoplasmic  $\mu$  ( $C\mu$ ) expression in acute lymphoblastic leukemia and, 885

- Immunoglobulin(s)**  
 clonal, in multiple myeloma, following autologous bone marrow and/or peripheral stem cell transplantation, 441  
 cytoplasmic, in acute lymphoblastic leukemia, analysis by molecular and immunologic techniques, 885  
 human non-A, non-B hepatitis/hepatitis C virus antibody in, prevalence of, 108  
 light chain types of, in Richter's syndrome, 656  
 oligoclonal, in multiple sclerosis, autochthonous production of, detection of, 858  
 polyclonal, serum concentration of, underestimation by electrophoresis, 610  
 polymerase chain reaction detection of heavy chain gene rearrangement and, 441  
 surface intensity of, in lymphoma diagnosis, 441
- Immunoglobulin G**, in multiple sclerosis, autochthonous production of, detection of, 858
- Immunoglobulin isotype**, flow cytometric detection of anti-pyruvate dehydrogenase antibody and, in primary biliary cirrhosis, 202
- Immunoglobulin M class capture assay**, cytomegalovirus-immunoglobulin M detection by, indirect enzyme-labeled immunosorbent assay vs., 441
- Immunohistochemistry**  
 in adenocarcinoma of lung, 678  
 of amyloid, localized to tenosynovium at carpal tunnel release, 250  
 amyloidosis vs. fibrillar glomerulopathy and, 787  
*c-erbB-2* oncogene and  
   in benign and malignant diseases of liver, S54  
   expression and nuclear DNA content in breast carcinoma, S48  
 characterization of atypical fibroxanthomas and dermatofibrosarcoma protuberans by, 478  
 diagnosis of adrenal cortical neoplasms and, 73  
 electron microscopy vs., in diagnostic surgical pathology, 441  
 endothelial, using four different markers, 441  
 in fibrous histiocytoma of parotid gland, 512  
 of lymph node interdigitating cell sarcoma, 139  
 monoclonal antibodies to *Pneumocystis carinii* and, 619  
 nonspecificity of colon-specific antigen in adenocarcinoma and, 490  
 oncogenic antigen 519 expression in prostatic adenocarcinoma and, 686  
 of p53, in colorectal carcinoma and adenoma, 244  
 prosomatostatin production and, in ampullary somatostatinoma, 411  
 in pulmonary meningioma, 814  
 in recurrent adult myofibromatosis, 810  
 steroid hormone receptors and, in endometrial stromal sarcomas, 381  
 thymic pseudotumorous enlargement due to follicular lymphoid hyperplasia in HIV-positive patient and, 420  
 Warthin-Finkeldey polykaryocyte and, 179
- Immunohistology**, bone marrow biopsy specimens analyzed by, in myelomonocytic leukemia, 441
- Immunoperoxidase**  
 duodenal biopsy specimens in HIV-infected patients and, 21  
 for heat shock protein 70 stress proteins, detection of myocardial ischemia by, 441  
 monoclonal antibody KP-1 (CD68) as histiocyte-specific marker in diagnosis of malignant fibrous histiocytoma and, 759
- Immunophenotyping**  
 of atrophoderma of Pasini and Pierini, 63  
 of diffuse aggressive B-cell lymphomas, of gastrointestinal tract, 170  
 in familial chronic lymphocytic leukemia, 184  
 flow cytometric, neural network analysis of, 441  
 of lymphocytes, in peripheral blood, by direct immunoalkaline phosphatase labeling and light scatter/absorption flow cytometric analysis, 322  
 paraffin, "CD43 only" phenotype and, 861  
 surface immunoglobulin intensity and mouse rosettes in, in lymphoma diagnosis, 441
- Immunosuppression**, adenovirus in gastrointestinal tract and, 555
- Inflammatory bowel disease**, metaplastic colonic epithelium and endocrine cell hyperplasia in, 441
- In situ hybridization**  
 adenovirus in gastrointestinal tract of immunosuppressed patients and, 555  
 of human papillomavirus, in precursor lesions of penis, 441  
 human papillomavirus RNA and, in penile dysplasias and carcinomas, 272
- In situ identification**, of *Dirofilaria repens* manifesting as breast nodule, 625
- Instruments evaluation**, automated hematology analyzers, 345
- Intensive care unit**, neonatal, accuracy and utility of differential white blood cell count in, 338
- Interleukin-1 $\alpha$** , in occlusive vascular disease, 8
- Interleukin-2**, biologically active, effect of verapamil on receptor expression of, flow cytometric measurement using phycoerythrin-conjugated recombinant interleukin-2, 441
- Intranuclear viral inclusions**, in hairy leukoplakia, diagnosis by exfoliative cytologic methods, 262
- Inv 16**, in acute myelogenous leukemia, with eosinophilia, serum lysosome value in, 195
- In vivo crossmatch**, multiinstitutional evaluation of, 441
- Iron deficiency**, reticulocyte mean channel fluorescence and, 130
- ISO-DALT**, in polyacrylamide cells, quality assurance and reproducibility of, 97
- Isoelectric focusing**, detection of autochthonous production of immunoglobulin G and oligoclonal immunoglobulins in multiple sclerosis and, 858

## K

- Kaposi's sarcoma**, bacillary epithelioid angiomatosis and, 713
- Kidney**. *See also headings beginning with term* Renal  
 amyloidosis vs. fibrillar glomerulopathy and, 787
- Ki-67 monoclonal antibody**  
 in fresh tissue, correlation with proliferating cell nuclear antigen counts in formalin-fixed paraffin-embedded tissue, S21  
 in soft tissue sarcomas, S30
- Knee replacement**, salvage and survival of red blood cells after, 441
- KP-1 monoclonal antibody**, in malignant fibrous histiocytoma, as histiocyte-specific marker in diagnosis, 759

## L

- Laboratory information system**, vendor for, relationship between pathology department and, 363
- Laboratory tests**  
 abnormal, clinicians' responses to, as function of diagnostic related group and test classification, 818  
 medical appropriateness of, 748
- Lamellar bodies**, in laboratory assessment of fetal lung maturity, 836
- Lamina propria**, duodenal biopsy specimens in HIV-infected patients and, 21
- Langerhans cells**, in atrophoderma of Pasini and Pierini, 63
- Large-cell carcinoma**, of lung, with neuroendocrine differentiation, 796
- Lecithin-sphingomyelin ratio**, in laboratory assessment of fetal lung maturity, 836
- Lectin**, in fibrous histiocytoma of parotid gland, 512
- Leiomyoma**  
 mitotically active, ovarian, 441

- ovarian, 441
- uterine
  - gonadotropin-releasing hormone agonist treatment of, 441
  - following leuprolide acetate treatment, 441
  - mitotically active, 14
- Leiomyosarcoma, uterine, mitotically active, 14
- Leu 22 (CD43), immunophenotyping and, 861
- Leukemia
  - acute, immunocytochemical analysis of, rapid, 876
  - B-cell, Russell bodies in, 866
  - "CD43 only" phenotype in, 861
  - chronic, large granular lymphocyte proliferation with natural killer-cell phenotype in, 353
  - hairly cell, 719
    - peripheral blood involvement in, 591
  - lymphoblastic, acute, cytoplasmic mu ( $C\mu$ ) expression in, analysis by molecular and immunologic techniques, 885
  - lymphocytic
    - acute, myeloperoxidase-positive, immunocytochemical analysis of, rapid, 876
    - chronic, Richter's syndrome and, 656
    - chronic familial, clinicopathologic study of, 184
    - small, peripheral blood involvement in, 591
  - myelogenous, acute, with eosinophilia, serum lysozyme value in, 195
  - myelomonocytic, immunohistologic analysis in bone marrow biopsy specimens, 441
  - pre-B cell, cytoplasmic mu ( $C\mu$ ) expression in, analysis by molecular and immunologic techniques, 885
- Leukocytes
  - depletion of, counting of leukocytes and, 872
  - in urine, predicting urinary tract infections in burn patients and, 441
- Leukopenia, cytospin differential count for specimens in, 441
- Leukoplakia, hairy, diagnosis by exfoliative cytologic methods, 262
- Leu M1, in Hodgkin's disease, staining for with secondary antibody specific for immunoglobulin M, 135
- Leu M-5 (CD 11c), in cytodiagnosis of body fluids, 441
- Leuprolide acetate, uterine leiomyomas following treatment with, 441
- Ligamentum arteriosum, atherosclerosis of, 441
- Light scatter/absorption flow cytometry, lymphocyte subtyping by, in peripheral blood, 322
- Lipid(s), duodenal biopsy specimens in HIV-infected patients and, 21
- Lipiodol, distribution of, in hepatocellular carcinoma, 405
- Lipoprotein (a), severity of atherosclerosis and frequency of coronary artery occlusion and, 441
- Liver, steatosis of, regression after gastric exclusion for morbid obesity, 441
- Liver disease. *See also specific diseases*
  - alcoholic, erythrocyte antioxidant activity, serum ceruloplasmin, and trace element levels in, 614
  - alkaline phosphatase isoenzyme electrophoresis in, 441
  - c-erbB-2 oncogene in, immunoreactivity for, S54
  - immunocytochemical identification of hepatocytes using monoclonal antibody to proliferating cell nuclear antigen and, S14
- Local recurrence, of myofibromatosis, in adult patient, 810
- Lucigenin chemiluminescence, superoxide release from phagocytes in small volumes of whole blood and, 566
- Lung, injury to, hyperplasia of type II pneumocytes in, 669
- Lung carcinoma
  - adenosquamous, clinicopathologic and immunohistochemical features of, 678
  - hyperplasia of type II pneumocytes in, 669
  - large cell, with neuroendocrine differentiation, 796
  - non-small cell, 163
    - expression of sugar moieties in, 441
    - peripheral airway cell marker expression in, 233
  - papillary adenoma and, 393
- Lymphadenitis, mycobacterial, in acquired immunodeficiency syndrome, morphologic features of, 441
- Lymphadenopathy, dermatopathic, in cutaneous T-cell lymphoma, 121
- Lymph nodes
  - extrathoracic metastases of occult mesothelioma and, diagnosis by fine-needle aspiration, 493
  - interdigitating cell sarcoma in, 139
  - submandibular, intranodal myofibroblastoma in, 69
- Lymphocytes
  - granular, large, with natural killer-cell phenotype, proliferation of, 353
  - in peripheral blood, subtyping by direct immunalkaline phosphatase labeling and light scatter/absorption flow cytometric analysis, 322
- Lymphoma
  - B-cell
    - of bone marrow, with abnormal karyotypes, in acquired immunodeficiency syndrome, 441
    - of breast, immunologic type and association with lymphocytic mastopathy, 699
    - of gastrointestinal tract, immunophenotypic and gene rearrangement analysis of, 170
    - monocytoid, peripheral blood involvement in, 591
    - Russell bodies in, 866
  - biphenotypic, Richter's syndrome and, 656
  - "CD43 only" phenotype in, 861
  - follicular center cell, surface immunoglobulin intensity and mouse rosettes in diagnosis of, 441
  - lymphocytic
    - intermediate, surface immunoglobulin intensity and mouse rosettes in diagnosis of, 441
    - small
      - peripheral blood involvement in, 591
      - surface immunoglobulin intensity and mouse rosettes in diagnosis of, 441
  - lymphoplasmacytic, of spleen, 147
  - malignant
    - of breast, immunologic type and association with lymphocytic mastopathy, 699
    - of gastrointestinal tract, immunophenotypic and gene rearrangement analysis of, 170
  - non-Hodgkin's
    - lymph node histopathologic findings in, 121
    - Richter's syndrome and, 656
  - splenic, with circulating villous lymphocytes, 147
  - surface immunoglobulin intensity and mouse rosettes in diagnosis of, 441
  - T-cell
    - cutaneous, lymph node histopathologic findings in, 121
    - hemophagocytic syndrome and, 189
- Lymphoproliferative disorder, chronic, large granular lymphocyte proliferation with natural killer-cell phenotype in, 353
- Lysozyme, in acute myelogenous leukemia, with eosinophilia, 195

## M

- Maffucci's syndrome, ovarian juvenile granulosa cell tumor associated with, 523
- Major histocompatibility complex, polymerase chain reaction mismatch technique to identify HLA-DQw8 allele in patients with type I diabetes mellitus and, 29
- Malabsorption, duodenal biopsy specimens in HIV-infected patients with and without, 21

Malignant effusions, sensitivity of Pap smears in diagnosis of, 441

Malignant fibrous histiocytoma, monoclonal antibody KP-1 (CD68) as histiocyte-specific marker in diagnosis of, 759

Malignant potential  
in renal cell carcinoma, flow cytometric prediction of, S39  
uncertain, of uterine leiomyomas, 14

Mast cell hyperplasia, gastrointestinal, in systemic sclerosis, 441

Mastitis, Fourier transform infrared spectroscopy in organic oil mastitis and, 34

MediSense Companion, accuracy and precision of, 441

Melanoma, immunohistochemical characterization of, 478

Meningioma, pulmonary, electron microscopy and immunohistochemistry in, 814

Meningitis, *Cryptococcus neoformans*, identification as leukocytes by Coulter counter, 663

Merkel cell carcinoma, multiple hamartoma syndrome associated with, 705

Mesenchymal tumor, fibrous histiocytoma of parotid gland and, 512

Mesothelioma, metastatic, occult, diagnosis by fine-needle aspiration, 493

Metastases  
extrathoracic, of occult mesothelioma, diagnosis by fine-needle aspiration, 493  
to ovaries, 745  
of tumors of large intestinal origin, simulating primary ovarian carcinoma, 751  
to spleen, of breast carcinoma, 484

Microwave oven, for thawing fresh frozen plasma, 227

Molecular biology, thymic pseudotumorous enlargement due to follicular lymphoid hyperplasia in HIV-positive patient and, 420

Molecular genetics, diagnosis of adrenal cortical neoplasms and, 73

Monoclonal antibodies  
Ki-67  
in fresh tissue, correlation with proliferating cell nuclear antigen counts in formalin-fixed paraffin-embedded tissue, S21  
in soft tissue sarcomas, S30  
KP-1 (CD68), in malignant fibrous histiocytoma, as histiocyte-specific marker in diagnosis, 759  
to *Pneumocystis carinii*, 619

Monoclonal gammopathies  
benign, flow cytometric DNA analysis and clinical correlations in, 322  
characterization of, immunochemical criteria for, 441

Morphology  
of cell proliferation, S4  
of lymph node interdigitating cell sarcoma, 139

Mouse rosettes, in lymphoma diagnosis, 441

Mu heavy chains, staining for Leu M1 (CD15) with secondary antibody specific for immunoglobulin M and, in Hodgkin's disease, 135

Multiple hamartoma syndrome, associated with renal cell carcinoma and primary neuroendocrine carcinoma of skin, 705

Multiple myeloma  
autologous bone marrow and/or peripheral stem cell transplantation in, clonal immunoglobulin additions following, 441  
flow cytometric DNA analysis and clinical correlations in, 322

Multiple sclerosis, immunoglobulin G and oligoclonal immunoglobulin production in, detection of, 858

Muscle-specific actin, in lobular capillary hemangioma, immunohistochemistry of, 770

Mycobacteria  
detection and identification of, using polymerase chain reaction followed by restriction enzyme digesting, 441  
lymphadenitis and, in acquired immunodeficiency syndrome, morphologic features of, 441

refractile, in Romanowsky-stained bone marrow smears, 318

*Mycobacterium avium-intracellulare*  
methenamine silver positivity of, 441  
in Romanowsky-stained bone marrow smears, 318

*Mycobacterium hemophilum*, osteomyelitis caused by, in acquired immunodeficiency syndrome, 441

Mycotic bursitis, olecranon, *Aspergillus terreus* as cause of, 114

Myelolipoma, extraadrenal, 402

Myelopoiesis, abnormal, transient, prenatal diagnosis via percutaneous umbilical blood sampling, 584

Myeloproliferative disorder, transient, prenatal diagnosis via percutaneous umbilical blood sampling, 584

Myocardial infarction, serum cardiac markers for, 217

Myocardial ischemia, detection of, by immunoperoxidase staining for heat shock protein 70 stress proteins, 441

Myofibroblastoma, intranodal, in submandibular lymph node, 69

Myofibromatosis, recurrent, in adult patient, 810

Myosin light chain 1, immunohistologic demonstration of, 376

# N

Natural killer cell, large granular lymphocyte proliferation with phenotype of, 353

Necrosis, squamous/mucinous metaplasia in oncotic salivary gland tumors and, 40

Needle biopsy, diagnosis of cirrhosis by, histologic clues and laparoscopic findings compared and, 441

Neonatal intensive care unit, accuracy and utility of differential white blood cell count in, 338

Neoplasm. *See also specific types and sites*  
extraskelatal myxoid chondrosarcoma of pleura and, 498

Nephelometry, estimation of concentration of polyclonal immunoglobulins in serum by, 610

Neural network  
analysis of flow cytometric immunophenotype data by, 441  
self-organizing, analysis of computer image DNA histograms by, 441

Neural-tube defect, maternal alpha-fetoprotein screening and, 541

Neuroendocrine carcinoma  
of skin, multiple hamartoma syndrome associated with, 705  
of uterine cervix, 516

Neuroendocrine tumors, large cell carcinoma of lung compared with, 796

Nuclear antigens, antibodies to, associated with collagen-vascular diseases, commercial enzyme immunoassays vs. immunofluorescence and double diffusion for, 559

Nuclear characteristics, of thyroid lesions, histopathologic typing and morphonuclear assessments and, 776

Nuclear magnetic resonance spectroscopy, 600 MHz, amniotic fluid analysis by, 441

Nucleic acid hybridization, detection of T-cell gene rearrangements by digoxigenin-labeled probes and, 638

Nucleolar organizer regions, silver stained, diagnostic utility in adrenocortical pathology, 441

# O

Olecranon bursa, *Aspergillus terreus* as cause of bursitis in, 114

Oligodendroglioma, dysembryoplastic neuroepithelial tumor vs., 398

Oncocyte, squamous/mucinous metaplasia in oncotic salivary gland tumors and, 40

Oncocytoma, renal, 44,X,-Y,-1 in, 441

Oncogene, *c-erbB-2*  
in benign and malignant diseases of liver, S54  
expression in breast carcinoma, S48

- Oncogene analysis, S1
- Oncogenic antigen 519, in prostatic adenocarcinoma, as potential prognostic indicator, 686
- Oral glucose tolerance test, in gestational diabetes mellitus, 831
- Organic oils, Fourier transform infrared spectroscopy in organic oil mastitis and, 34
- Osteomyelitis, *Mycobacterium hemophilum* causing, in acquired immunodeficiency syndrome, 441
- Ovarian carcinoma, metastatic, of large intestinal origin, simulating primary ovarian carcinoma, 751
- Ovarian tumors
  - metastatic, 745
  - smooth muscle, primary, 441
  - stromal, associated with Maffucci's syndrome, 523

## P

- p53, immunohistochemical study of, in colorectal carcinoma and adenoma, 244
- Pancreatic specific isoamylase, in pancreatitis, 441
- Pancreatitis, pancreatic specific isoamylase in, 441
- Panhypopituitarism, reversible dilated cardiomyopathy due to growth hormone deficiency and, 503
- Papillary neoplasms
  - renal, 441
  - thyroid, 426
- Papilloepidic growth pattern, in non-small cell lung carcinoma, 233
- Pap smears
  - benign cellular atypia and, 441
  - sensitivity of, in diagnosis of malignant effusions, 441
- Paraffin-embedded tissue
  - DNA analysis of, variation in reference cells for, 387
  - formalin-fixed, of proliferating cell nuclear antigen, correlation with Ki-67 in fresh tissue, S21
  - image cytometric analysis of renal cortical neoplasms and, 441
  - radiologic identification of microcalcifications in breast tissue and, significance of, 441
- Parathyroid lesions, cystic, unsuspected, fine-needle aspiration biopsy of, 441
- Parotid gland, fibrous histiocytoma of, 512
- Patient data, quality control of multichannel hematology analyzers and, 645
- PC10, proliferating cell nuclear antigen counts in formalin-fixed paraffin-embedded tissue and, S21
- Peliosis hepatis, bacillary epithelioid angiomatosis vs., 713
- Penile carcinoma, human papillomavirus RNA in, 272
- Penile intraepithelial neoplasia, human papillomavirus RNA in, 272
- Penile lesions
  - human papillomavirus distribution in, polymerase chain reaction detection of, 441
  - precursor, *in situ* hybridization of human papillomavirus in, 441
- Percutaneous umbilical blood sampling, prenatal diagnosis of transient myeloproliferative disorder via, 584
- Peripheral blood, in monocytoid B-cell lymphoma, 591
- Phlebotomy, serum bicarbonate testing and, sample size in vacutainer tubes and, 213
- Phosphatidylglycerol, in laboratory assessment of fetal lung maturity, 836
- Placenta, herpes simplex infection of, 441
- Plasma, fresh frozen, thawing in microwave oven, 227
- Plasmacytoid differentiation, Russell bodies and, 866
- Platelet(s), isolation from human blood by density gradient centrifugation, rapid method for, 441
- Platelet agglutination, spurious thrombocytopenia and, due to EDTA-independent cold-reactive agglutinins, 359
- Platelet aggregation, *in vitro*, in heparin-induced thrombocytopenia, effect of heparin source and concentration on, 441
- Platelet counting, spurious thrombocytopenia and, due to EDTA-independent cold-reactive agglutinins, 359
- Platelet dysfunction, hereditary, atherosclerosis and unstable angina in, 652
- Pleura, extraskeletal myxoid chondrosarcoma of, 498
- Ploidy
  - DNA
    - in breast carcinoma, S48
    - of soft tissue sarcomas, determination by image cytometry of fresh frozen tissue, S30
  - in endometrial stromal sarcoma, 267
- Pneumatic tube system, computerized, effects on analytical results and turnaround time, 535
- Pneumocystis carinii* pneumonia, monoclonal antibody to, 619
- Pneumocytes, type II
  - in cytologic specimens, 608
  - hyperplasia of, in acute lung injury, 669
- Pneumonia, *Pneumocystis carinii*, monoclonal antibody to, 619
- Polykaryocytes, Warthin-Finkeldey, T-cell immunophenotype of, 179
- Polymerase chain reaction
  - detection of human papillomavirus distribution in penile lesions by, 441
  - detection of T-cell gene rearrangements by digoxigenin-labeled probes and, 638
  - hepatitis C virus detection by, disease activity correlated with, 441
  - immunoglobulin heavy chain gene rearrangement detection by, 441
  - minimal residual B-cell neoplasia detection by, 441
  - restriction enzyme digesting following, mycobacteria detection and identification using, 441
- Polymerase chain reaction mismatch technique, to identify HLA-DQw8 allele in patients with type I diabetes mellitus, 29
- Prealbumin, amyloid localized to tenosynovium at carpal tunnel release and, 250
- Precision
  - of Companion 2 Glucose Sensor, 441
  - of MediSense Companion, 441
- Pregnancy
  - amniotic fluid analysis by 600 MHz proton nuclear magnetic resonance spectroscopy in, 441
  - fine-needle aspiration of breast lesions in, 441
  - maternal alpha-fetoprotein screening and, 541
  - twin, medial maternal serum alpha-protein levels in, 441
- Progesterone receptors
  - in breast cancer, immunocytochemical determination on fine-needle samples of, 254
  - in cervical adenocarcinoma, immunohistochemical evaluation of, 441
  - in lobular capillary hemangioma, immunohistochemistry of, 770
- Prognosis, of cutaneous T-cell lymphoma, lymphadenopathy and, 121
- Prognostic factors
  - in adrenal cortical neoplasms, 73
  - in prostatic adenocarcinoma, oncogenic antigen 519 expression as, 686
- Proliferating cell nuclear antigen
  - in formalin-fixed paraffin-embedded tissue, correlation with Ki-67 in fresh tissue, S21
  - monoclonal antibody to, immunocytochemical identification of hepatocytes using, S14
- Proliferation index, of soft tissue sarcomas, determination by image cytometry of fresh frozen tissue, S30
- Prosomatostatin, production of, in ampullary somatostatinoma, 411

- Prostate cancer  
 oncogenic antigen 519 expression in, as potential prognostic indicator, 686  
 prostate-specific antigen in, diagnostic efficiency of, 441  
 serum prostate-specific antigen in, alterations associated with digital rectal examination: and, 466, 528  
 stage A1, serum prostate-specific antigen levels in, 441
- Prostate-specific antigen  
 in benign prostate hyperplasia, acute prostatitis, and untreated prostate cancer, diagnostic efficiency of, 441  
 outpatient determination of, 441  
 serum, digital rectal examination-associated alterations in, 466, 528  
 serum levels of, in stage A1 prostate cancer, 441
- Prostatitis  
 acute, prostate-specific antigen in, diagnostic efficiency of, 441  
 serum prostate-specific antigen in, alterations associated with digital rectal examination and, 466, 528
- Protein A-gold, amyloidosis vs. fibrillar glomerulopathy and, 787
- Pseudoacidosis, serum bicarbonate testing and, sample size in vacutainer tubes and, 213
- Purpura, idiopathic thrombocytopenic, breast carcinoma metastatic to spleen and, 484
- Pyruvate dehydrogenase, flow cytometric detection of antibody to, in primary biliary cirrhosis, 202

## Q

- Quality assurance  
 quality improvement approaches and, pediatric patients and, 441  
 two-dimensional electrophoresis and silver staining and, in polyacrylamide cells, 97  
 wristband error reporting and, 441
- Quality control  
 of multichannel hematology analyzers, 645  
 two-dimensional electrophoresis and silver staining and, in polyacrylamide cells, 97
- Quinolone antibiotics, *in vitro* susceptibility of *Staphylococcus aureus* against, 441

## R

- Random error, quality control of multichannel hematology analyzers and, 645
- Rapid methods  
 for anti-HIV-1 antibody detection, 854  
 for assay of superoxide release from phagocytes in small volumes of whole blood, in chronic granulomatous disease, 566  
 for immunocytochemical analysis of acute leukemias, 876  
 for isolation of platelets from human blood by density gradient centrifugation, 441
- Reactive proliferation  
 in cutaneous T-cell lymphoma, 121  
 in spindle cell hemangioma, 279
- Reagent strip screening, yellow IRIS compared with, in urine culture specimens, 441
- Rectal examination, digital, alterations in serum prostate-specific antigen associated with, 466, 528
- Red blood cell distribution width, correlation with location of colorectal carcinoma, 441
- Red blood cell indices, quality control of multichannel hematology analyzers and, 645
- Reference cells, for DNA analysis of paraffin-embedded tissue, variation in, 387

- Regenerative muscle, myocardial proteins in, immunohistologic demonstration of, 376
- Rejection, of cardiac transplant, autopsy and, 369
- Renal carcinoma  
 chromophobe cell, 441  
 papillary, 441
- Renal cell carcinoma  
 bromodeoxyuridine and DNA bivariate analysis in, S39  
 multiple hamartoma syndrome associated with, 705
- Renal cortical neoplasms, paraffin-embedded sections of, image cytometric analysis of, 441
- Renal oncocytoma, 44,X,-Y,-1 in, 441
- Research prototype, relationship between pathology department and laboratory information system vendor and, 363
- Restriction endonuclease analysis, genomic, typing of ciprofloxacin-resistant methicillin-resistant *Staphylococcus aureus* by, gene sequencing vs., 441
- Restriction enzyme digesting, following polymerase chain reaction, mycobacteria detection and identification using, 441
- Reticulocyte(s), mean channel fluorescence and, iron status and, 130
- Reticulocyte count, after bone marrow transplantation, 574
- Rhabdomyosarcoma, myocardial proteins in, immunohistologic demonstration of, 376
- rhGM-CSF, therapy with, bone marrow and blood findings after, 631
- Richter's syndrome, immunoglobulin light chain types in, 656
- RNA, human papillomavirus, in penile dysplasias and carcinomas, differing prevalence and etiology of, 272
- Romanowsky stain, bone marrow smears and, refractile mycobacteria in, 318
- RPSP, two-dimensional electrophoresis in polyacrylamide cells and, quality assurance and reproducibility of, 97
- Russell bodies, phenotypic expression of, 866

## S

- Sarcoma  
 interdigitating cell, of lymph node, 139  
 Kaposi's, bacillary epithelioid angiomatosis and, 713  
 soft-tissue, DNA ploidy and proliferation index of, determination by image cytometry of fresh frozen tissue, S30  
 stromal, endometrial  
 flow cytometric analysis of, 267  
 steroid hormone receptors in, 381
- Screening, maternal alpha-fetoprotein and, 541
- Seminoma, transformation to yolk sac tumor, 463, 468
- Sensitivity  
 of Pap smears, in diagnosis of malignant effusions, 441  
 of staining for Leu M1 (CD15) in Hodgkin's disease, with secondary antibody specific for immunoglobulin M, 135
- Septic bursitis, olecranon, *Aspergillus terreus* as cause of, 114
- Serous effusions, cytology of, 441
- Serum protein electrophoresis, in polyacrylamide cells, quality assurance and reproducibility of, 97
- Silicone fluid, Fourier transform infrared spectroscopy in organic oil mastitis and, 34
- Silver staining  
 monoclonal antibodies to *Pneumocystis carinii* and, 619  
 of nucleolar organizer regions, diagnostic utility in adrenocortical pathology, 441  
 in polyacrylamide cells, quality assurance and reproducibility of, 97
- Skin, neuroendocrine carcinoma of, multiple hamartoma syndrome associated with, 705
- Small cell undifferentiated carcinoma, of uterine cervix, 516

- Small intestinal disorders, in HIV-infected patients, duodenal biopsy specimens in, 21
- Smoking, non-small cell lung carcinoma and, 233
- Smooth muscle  
tumors of  
ovarian, primary, 441  
uterine, mitotically active, 14  
vascular, response to injury, 1
- Soft-tissue neoplasms, extraadrenal myelolipoma and, 402
- Solid-phase derivitization, amphetamine quantitation using, 441
- Somatostatin, production of, in ampullary somatostatinoma, 411
- Somatostatinoma, ampullary, prosomatostatin production by, 411
- Specimen delivery, computerized pneumatic tube specimen delivery system and, 535
- Spina bifida, maternal alpha-fetoprotein screening and, 541
- Spleen  
breast carcinoma metastatic to, 484  
fine-needle aspiration of, in neoplastic disorders, 441  
lymphoma of, with circulating villous lymphocytes, 147
- Squamous cell carcinoma  
immunohistochemical characterization of, 478  
of lung, clinicopathologic and immunohistochemical features of, 678
- Squamous metaplasia, in oncotic salivary gland tumors, 40
- Staphylococcus aureus*  
ciprofloxacin-resistant methicillin-resistant, typing by gene sequencing vs. genomic restriction endonuclease analysis in, 441  
*in vitro* susceptibility against quinolone antibiotics, 441
- Steatosis, hepatic, regression after gastric exclusion for morbid obesity, 441
- Stem cells, peripheral, transplantation of, in multiple myeloma, clonal immunoglobulin additions following, 441
- Streptavidin-biotin, in immunocytochemical analysis of acute leukemias, 876
- Subcutaneous nodule, of breast, *Dirofilaria repens* manifesting as, 625
- Sugar moieties, expression in non-small cell lung carcinoma, 441
- Supernatant component, of bronchoalveolar lavage specimen, recovery of cytomegalovirus from, 313
- Superoxide, release from phagocytes in small volumes of whole blood, in chronic granulomatous disease, rapid, specific assay for, 566
- Superoxide dismutase, in alcoholic liver disease, 614
- Surface tension, in laboratory assessment of fetal lung maturity, 836
- Surfactant  
in laboratory assessment of fetal lung maturity, 836  
in non-small cell lung carcinoma, 233
- Surgery  
cardiac  
blood loss and transfusion in, preoperative hemostasis tests and, 441  
transplantation, autopsy and, 369  
carpal tunnel release, amyloid localized to tenosynovium at, 250  
coronary artery bypass, interleukin-1 $\alpha$  in occlusive vascular disease and, 8  
elective, autologous blood transfusion for, successful, factors associated with, 304  
gastric exclusion, regression of hepatic steatosis after, 441  
hip and knee replacement, salvage and survival of red blood cells after, 441
- Synthetic peptide, for anti-HIV-1 antibody immunoassay, 854
- Syphilis  
chronic active gastritis in, 116  
serologic diagnosis of, Syphilis-G Enzyme Immunoassay Test Kit for, 441  
"tree-barking" of ascending aorta in, 58
- Syphilis-G Enzyme Immunoassay Test Kit, serologic diagnosis of syphilis with, 441
- Systemic lupus erythematosus, "tree-barking" of ascending aorta in, 58
- Systemic sclerosis, gastrointestinal mast cell hyperplasia in, 441
- ## T
- T cells  
in atrophoderm of Pasini and Pierini, 63  
gene rearrangements of, detection by digoxigenin-labeled probes amplified from genomic DNA, 638  
helper, Warthin-Finkeldey polykaryocyte and, 179
- Teratoma, myocardial proteins in, immunohistologic demonstration of, 376
- Testicular embryonal carcinoma, flow cytometric analysis of, 441
- Testicular neoplasm, transformation of seminoma to yolk sac tumor and, 463, 468
- Test utilization, as function of diagnostic related group and test classification, 818
- Tetanus, heart in, histopathology of, 441
- Thrombin, bovine and human, antibodies to, after surgical use of bovine thrombin, 84
- Thrombocytopenia  
heparin-induced, effect of heparin source and concentration on *in vitro* platelet aggregation and, 441  
idiopathic thrombocytopenic purpura and, breast carcinoma metastatic to spleen and, 484  
spurious, due to EDTA-independent cold-reactive agglutinins, 359
- Thromboembolic effect, of Lipiodol, in hepatocellular carcinoma, 405
- Thrombohemorrhagic disorder, consumptive, angiosarcoma of colon developing in capsule of foreign body and, 416
- Thymus, pseudotumorous enlargement of, due to follicular hyperplasia, in HIV-positive patient, 420
- Thyroid gland lesions  
histopathologic typing and morphonuclear assessments of, 776  
papillary neoplasms, 426
- Trace elements, in alcoholic liver disease, 614
- Transferrin receptors, iron status and, reticulocyte mean channel fluorescence and, 130
- Transfusions  
autologous, 297  
successful, factors associated with, 304  
in cardiac surgery, preoperative hemostasis tests and, 441  
fresh frozen plasma for, thawing in microwave oven, 227  
salvage and survival of red blood cells after hip and knee replacement and, 441  
wristband error reporting and, 441
- Transitional cell carcinoma, *in situ* and invasive high-grade, cytomorphic differences between, 441
- TranStat CMV, cytomegalovirus antibody detection by, 441
- Transthyretin, amyloid localized to tenosynovium at carpal tunnel release and, 250
- Tree-bark appearance, of ascending aorta, in syphilis and systemic lupus erythematosus, 58
- Treponema pallidum*, in chronic active gastritis, 116
- Tumor marker  
in rhabdomyosarcoma, immunohistologic demonstration of, 376  
in teratoma, immunohistologic demonstration of, 376
- Turnaround time, computerized pneumatic tube specimen delivery system and, 535
- Two-dimensional electrophoresis, in polyacrylamide cells, quality assurance and reproducibility of, 97

## Type II cells

- in non-small cell lung carcinoma, 233
- in papillary adenoma of lung, 393

## U

- Ulex europaeus* lectin, in lobular capillary hemangioma, immunohistochemistry of, 770
- Ultracentrifuge, tabletop, drug distribution in plasma protein and lipoprotein fractions determined with, 441
- Urinalysis, microscopic results of, predicting urinary tract infections in burn patients from, 441
- Urinary tract infections, predicting in burn patients, from microscopic urinalysis results, 441
- Urine culture, reagent strip screening vs. microscopic examination of yellow IRIS in specimens submitted for, 441
- Uterine cervix
  - adenocarcinoma of, estrogen and progesterone receptors in, immunohistochemical evaluation of, 441
  - amphicrine carcinoma of, 516
  - biopsy of, benign cellular atypia and, 441
  - cervical intraepithelial neoplasia and, dot filter hybridization vs. conventional morphologic analysis for detection of human papillomavirus and, 46
  - cytology of, cytobrush collection technique for, extent and rationale of clinician's lack of use of, 441
  - human papillomavirus infection of, correlation between infection rates and dysplasia and, 692
- Uterus
  - leiomyomas of
    - gonadotropin-releasing hormone agonist treatment of, 441
    - following leuprolide acetate treatment, 441
    - mitotically active, 14
  - neoplasms of, steroid hormone receptors in, 381
  - papillary adenofibroma of, 806

## V

- Vacutainer, serum bicarbonate testing and, sample size and, 213
- Value-added reseller, of laboratory information systems, relationship between pathology department and, 363
- Varicella, cold agglutinin disease after, 92
- Vascular disease, occlusive, interleukin-1 $\alpha$  in, 8
- Vascular sclerosis, interleukin-1 $\alpha$  in, 8
- Vascular smooth muscle, response to injury, 1
- Vasocclusion, interleukin-1 $\alpha$  in, 8
- Verapamil, biologically active interleukin-2 receptor expression and, flow cytometric measurement using phycoerythrin-conjugated recombinant interleukin-2, 441
- Vimentin, in lobular capillary hemangioma, immunohistochemistry of, 770
- Viral infection. *See specific viruses*
- Viral particles, duodenal biopsy specimens in HIV-infected patients and, 21
- Viral recovery, differential, from cellular and supernatant components of bronchoalveolar lavage specimen, 313
- Vitamin B<sub>12</sub>, deficiency of, duodenal biopsy specimens in HIV-infected patients and, 21

## W

- Warthin-Finkeldey polykaryocyte, T-cell immunophenotype of, 179
- Warthin's tumor, squamous/mucinous metaplasia in oncotoc salivary gland tumors and, 40
- Waterbath, for thawing fresh frozen plasma, thawing in microwave oven vs., 227
- White blood cell differential
  - accuracy and utility of, in neonatal intensive care unit, 338
  - automated, unsuspected eosinophilia discovered by, clinical significance of, 441
  - comparative study of four automated analyzers for, 345
  - cytospin technique for, in leukopenia, 441

## X

- 44,X,-Y,-1, in renal oncocytoma, 441
- D-Xylose, duodenal biopsy specimens in HIV-infected patients and, 21

## Y

- Yeasts, cross-reaction of, with Chlamydiazyme test, before and after use of blocking agent, 309
- Yellow IRIS, reagent strip screening compared with, in urine culture specimens, 441
- Yolk sac tumor, transformation of seminoma to, 463, 468

## Z

- Zinc toxicity, copper-deficiency anemia caused by, bone marrow precursor cells in, morphologic findings in, 665

**Abstracts of Paper and Poster Presentations, Scientific Sessions of the Spring Meeting of the American Society of Clinical Pathologists and the College of American Pathologists, April 4-9, 1992 in Boston, Massachusetts, 441**
